## Brachial plexus

The brachial plexus is a group of nerves that run from the lower neck through the upper shoulder area. These nerves provide the shoulder, arm, forearm, and hand with movement and sensation.

### Information

Damage to the brachial plexus nerves can cause muscle and sensation problems that are often associated with pain in the same area. Symptoms may include:

- Loss of feeling or sensation in your arm or hand
- Trouble moving your arm or hand
- Lack of muscle control in the arm, hand, or wrist
- Severe pain
