## NEWS & EVENTS

### A LIFELINE FOR CAMBODIAN FAMILIES LIVING WITH HEMOPHILIA

For many families in Cambodia, hemophilia once meant a lifetime of suffering and fear. Heng Kim recalls the heartbreak early years of her son's life: "When he first began walking, his legs would often get swollen. The swelling would last quite a long time... he would often cry out, 'Mom, help me!'" The situation was so dire, she had to carry him on her back to school. At that time, she explains, she felt like all hope was lost. Everything changed when her son began receiving donated treatment products provided by the WFH...

The advertisement features a red and purple background. On the left, there is a circular logo with a stylized heart and a person icon. To its right, the text reads "WOMEN & GIRLS WITH BLEEDING DISORDERS" and "WFH GLOBAL SUMMIT". Below this, a call to action says "Join us online: September 25–26, 2025" and "Register now: [wfh.org/WGBD](http://wfh.org/WGBD)". On the right side, there is a circular photo of four women smiling. At the bottom right, the WFH logo is displayed with the text "WORLD FEDERATION OF HEMOPHILIA".

\* Interpretation available in English, French, Spanish, Arabic, Russian, German, Portuguese, Chinese (Mandarin), Hindi and Urdu.

## REGISTRATION OPEN: 4TH WFH GLOBAL SUMMIT ON WOMEN AND GIRLS WITH BLEEDING DISORDERS

Registration is now open for the 4th WFH Global Summit on Women and Girls with Bleeding Disorders (WGBD)! Taking place virtually on September 25 to 26, 2025, this two-day event will bring together people with bleeding disorders, families, healthcare providers, national member organization (NMO) advocates, and other stakeholders for a global exchange of knowledge, lived experience, and best practices.

## "Why is the uptake of gene therapy in hemophilia less than expected?"

*Read the Research and Practice in Thrombosis and Haemostasis (RPTH) article now*

### ARTICLE PUBLISHED ON UPTAKE OF GENE THERAPY IN HEMOPHILIA

Gene therapy is an important milestone in the development of treatment options for people with hemophilia, offering the potential to improve their clinical outcomes—including quality of life—with a one-time infusion. Unfortunately, the development of this treatment option has faced numerous challenges, and unwarranted criticism has been placed on the community, confusing issues and taking momentum away from more productive activities.
