Infant and Newborn Care

Also called: Baby care

Going home with a new baby is exciting, but it can be scary, too. Newborns have many needs, like frequent feedings and diaper changes. Babies can have health issues [<https://medlineplus.gov/commoninfantandnewbornproblems.html>] that are different from older children and adults, like diaper rash and cradle cap.

Your baby will go through many changes [<https://medlineplus.gov/infantandnewborndevelopment.html>] during the first year of life. You may feel uneasy at first. Ask your health care provider for help if you need it.
