

Care Settings

As we age, we may find that we need more help with our daily lives. To get this help, some changes may need to be made to the home or we may need to consider moving to a new home that can better fit our needs. This can happen for a number of reasons, including disability or changing medical needs.

For older adults facing these decisions, there are a number of options to consider, from staying in the home to moving to a care facility.

Learn about the various types of care settings:
