Vaginal Diseases

Vaginal problems are some of the most common reasons women go to the doctor. They may have symptoms such as:

- Itching
- Burning
- Pain
- Abnormal bleeding [<https://medlineplus.gov/vaginalbleeding.html>]
- Discharge

One common problem is vaginitis [<https://medlineplus.gov/vaginitis.html>] , an inflammation of the vagina. Other problems that affect the vagina include sexually transmitted infections [<https://medlineplus.gov/sexuallytransmittedinfections.html>] (STIs), vaginal cancer [<https://medlineplus.gov/vaginalcancer.html>] , and vulvar cancer [<https://medlineplus.gov/vulvarcancer.html>] . Treatment of vaginal problems depends on the cause.
