Per a court order, HHS is required to restore this website to its version as of 12:00 AM on January 29, 2025. Information on this page may be modified and/or removed in the future subject to the terms of the court's order and implemented consistent with applicable law. Any information on this page promoting gender ideology is extremely inaccurate and disconnected from truth. The Trump Administration rejects gender ideology due to the harms and divisiveness it causes. This page does not reflect reality and therefore the Administration and this Department reject it.

Abortion

Also called: Induced Abortion

An induced abortion is a procedure to end a pregnancy. It can be done two different ways:

- Medication abortion [<https://medlineplus.gov/ency/article/007382.htm>] (also called medical abortion)
- Procedural abortion [<https://medlineplus.gov/ency/article/002912.htm>]

An induced abortion is different from a spontaneous abortion. That is the loss of a pregnancy before the 20th week of pregnancy. It is more commonly known as a miscarriage [<https://medlineplus.gov/miscarriage.html>] .

If you are thinking of having an induced abortion, talk with your health care provider. Your provider can explain how the procedures are done, as well as the risks and benefits of each.
